

Documentation

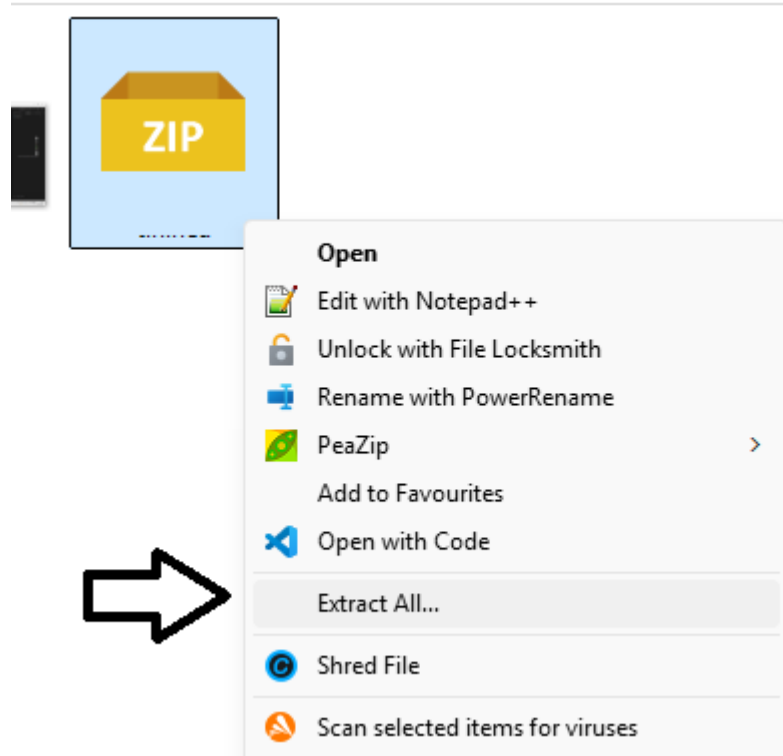

Qwik Paste is a powerful Windows desktop productivity tool that lets you instantly capture images, audio, and files from your clipboard or copied URLs and use them directly in any application via drag & drop—without manually saving files first. It's built for creators, marketers, developers, and power users who want to move faster and stay focused.

Stop wasting time saving files, choosing folders, and re-uploading content. With instant clipboard capture, automatic URL downloading, and drag-and-drop support, Qwik Paste removes unnecessary steps from your daily workflow and lets you use content the moment you copy it.

Important: Qwik Paste is a 100% offline Windows desktop application. No subscriptions, no API keys, and no internet connection required for clipboard capture and usage.

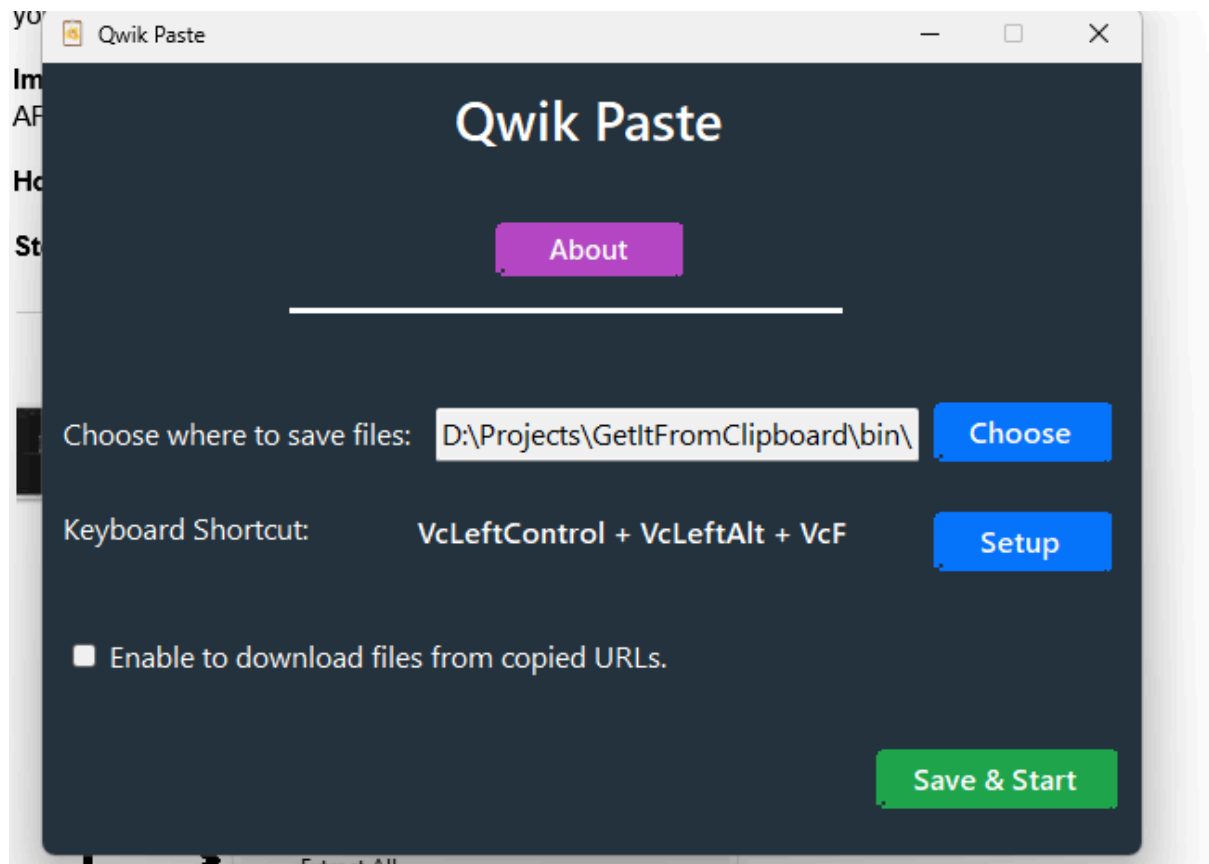

How To Install :

Step 1 :Unzip The File

Step 2 : Run the EXE File

When you open the tool you will this window:

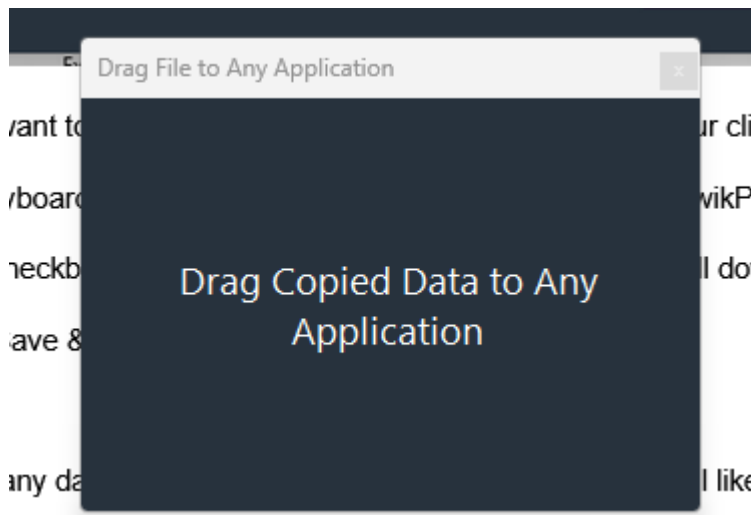

Setup where you want to save the copied images,audios,files.. From your clipboard¹

Then setup the keyboard shortcut to press when you want to activate QwikPaste.

If you check that checkbox this means when you copy a URL the tool will download it.

Once done, click Save & Start, then Minimize the tool.

Now Simply copy any data then press the keyboard shortcut and you will like this window:

Just drag from this window to your app like premier pro...
