

WordPress Bulk Comments AutoPoster – User Guide

1. How to Unzip and Run the Tool

1. Download the ZIP file you received after purchase.
2. Right-click the ZIP file and choose **"Extract All..."**
3. Choose a folder and click **"Extract."**
4. Open the extracted folder.
5. Double-click the file named **WordPressAutoComments.exe** to launch the tool.
6. If Windows shows a SmartScreen warning, click **"More info"** → **"Run anyway."**

After open the tool the main window will be like this:

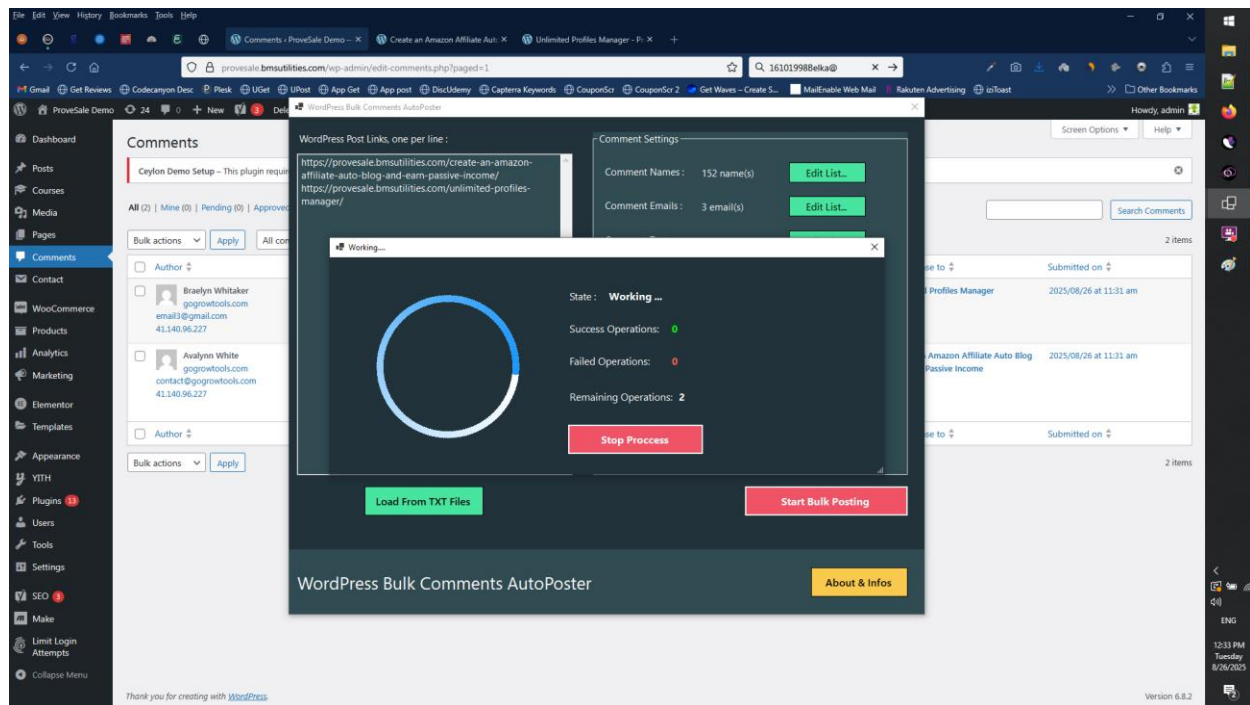

In the **Wordpress Post Links**, you add all the wordpress post links that you want to submit a comment on it, no limit, you can also upload those links via text file.

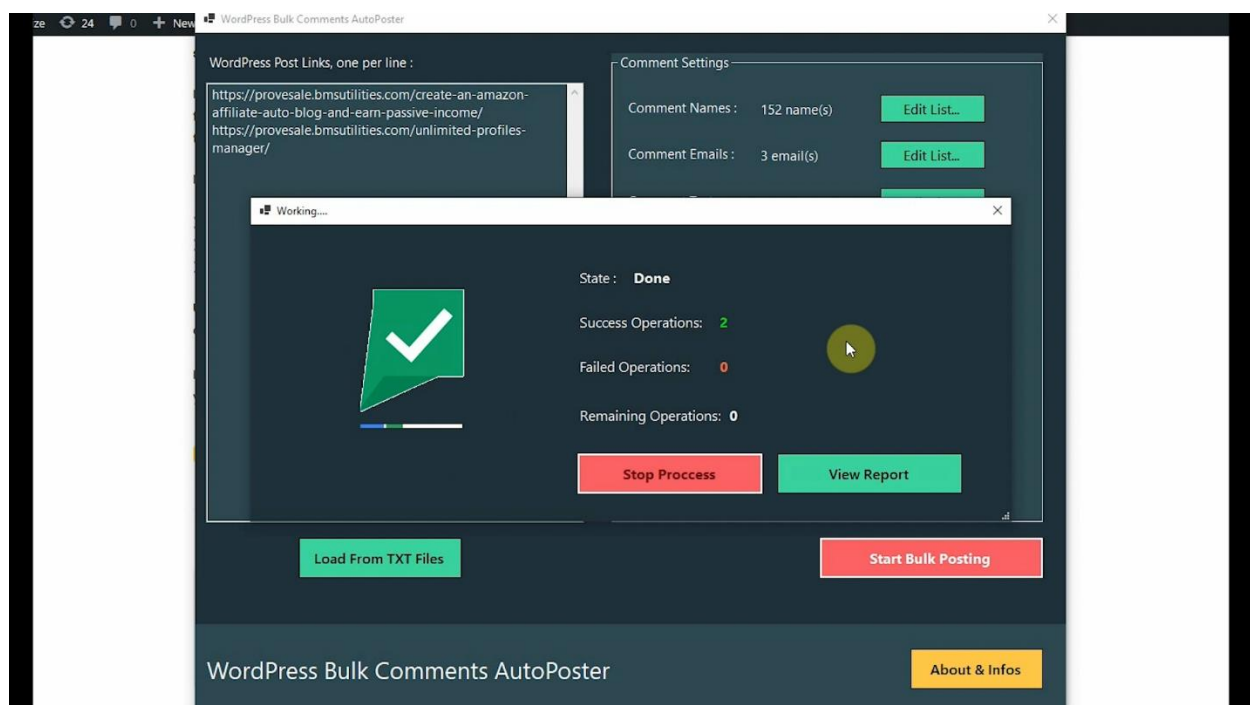

Next side, you will see Names,Emails,Comments and URLs settings, those are the comment data that will be posted, click Edit List Button and add any data.

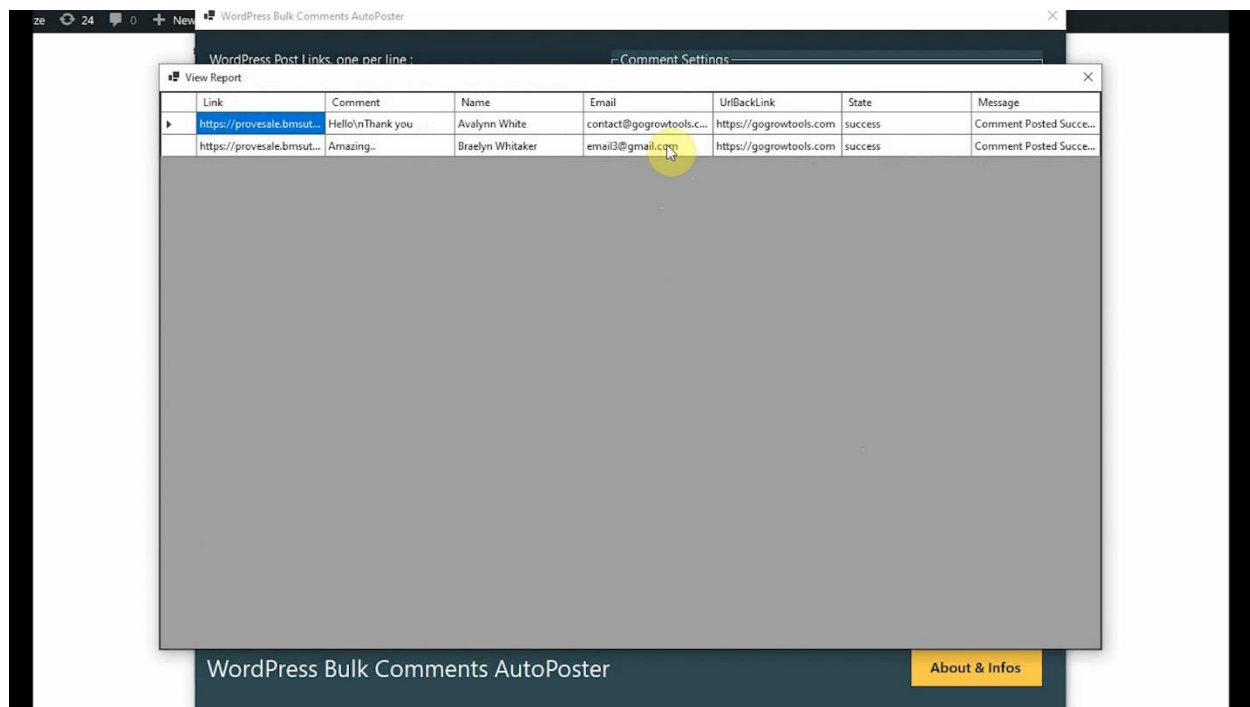

At the bottom you have a settings of multi-threads, this allows you to run several requests in same time.

Once all done click Start Bulk Posting, and you will see like this window:

Once finished you will see this window, you can click view report to see the details of each request:
